Pulling off tricks in HackyZack is so fun and gratifying, and there are so many mechanics + ball types. There's lots of content to keep you going, especially because target mode will probably take you years. There's cute characters to choose from as well. Did I mention the soundtrack's great? It's beautifully ambient and perfectly suits the game's theme. 9.5V10. This game is probably one of the more scarish type of the slightly more recent games. It has really easy to figure out puzzles and a super cool story that really pulls you into it. I've always enjoyed this game. A great game for those that enjoy story richness and great puzzles.. This game is hard, I mean not as hard as dark souls, but hard. The game lures you in, pretending to be a pixelated fun world, but then you get hit, and hit over, and over again, each time you die, it takes a bit out of your soul.

Things I would improve:

The hitbox for the damn frog. Nice, friendly graphics. Relaxing, yet very challenging. Recommended!. Grabbed the space looking vehicle, Came 3rd, Raged and made this review.

Could not find the controls for 20 mins, Lost the race worth it? Yes ofcourse! Not even worth 11 pence tbh. lel

Sorry, This game is poor 10/10

If you're of that age where you watched Tron on the big screen and marvelled at the visual style, then you've come to the right place.

Of all the Tron-related games and sequel movies (and I include Tron 2.0 in this!), I think this game comes the closest to replicating the "feel" of the world of the first Tron movie. The only thing missing are the discs and the clank-clank as you walk around (which Tron 2.0 got so so right for me)..

So, what is Tank Universal? Well, it's a Tron-homage-labour-of-love. It's clearly an indie game. The lack of voice-overs, and very simplistic animation marks it out as a small-team (one man?) effort. Also, the story is very similar to Tron (Bad Guy taking over the system, User logs in to kick\u2665\

Tank Universal packs so much in. There's a little bit of wandering-around on foot, and a lot of time spent in a tank. While in the tank, you can traverse mazes, explore the beautiful world they created, play domination, and so on. Everything under the 'umbrella' of being a good dude fighting in a world of bad dudes, and needing to travel around it to stay ahead of the 'bad dudes', while getting closer to the 'big bad dude' for the final fight... There's really quite a lot of variety, and stuff isn't repeated to death, like they would be in a AAA game, where they have to milk every last cent out of an expensive asset (for example).

I was impressed by pretty much everything in this game. The ship\tank models are lush. The world design is stunning. The sounds\tank music are very very close to Tron, and the visuals are 100% spot-on (They even replicate the irregular 'flashing' of the poor rotoscoping in the movie by pulsing the brightness.. So ingenous..)..

Is there anything which makes me unhappy? That the game ended. Playing domination was great fun (I was playing in easy mode, which may explain it).

So, if you love Tron, and want to play a tron-like classic good vs. evil game, and aren't too hung up over spoken voiceovers, or FMV, then this game is for you!.

Highly Recommended

. Its like wave race with fun tricks. The game controls well and is overall very east to pick up and play, couch splitscreen is the way to go with this one.. got a good first impression

the camera and menu animation feels slow and weird (what was the point of having first person camera again?) the RPG battles feels like Neptunia VIIR although, again, a bit clunky

heard that you can change the battles' genre but i havent reached that point yet

all in all, maybe it's just my laptop or a bad port so i'll try playing it on the PS4

i hope i will enjoy this game as much as i enjoy Neptunia. it fun when i water bord the baby and poop on it and throw it in a toilet\

. I really wanted to like this. I enjoy "idle" games....and this had the potential of customizing my ship with the crew I wanted and sending it out into combat. But the auto gunners are morons and couldn't hit water if they fell off the ship. OK, no prob, I'll take a more active role in combat. But...the customization options are shallow....you HAVE to have a specific set up, and theres really no challenge about it.

I managed to methodically fight the same three aircraft over and over again (think Jaws for the NES) in order to get to the enemy base. As I was shooting shield generators in a sudden first person persepective, the game opted to crash on me. I didn't go back in and start over...I just took it as a sign.

This would've been an excellent premise and if more effort was funneled into this game it could've goin far. But the player base feels the game is abandoned, and it definitely feels like a game that needs a bit of a polish before being fun.
